Documentation for system administrators

System Administrators' Manual

Documentation	£				L
Documentation	TOT	CVCTAM	aom	imici	rainre
Documentation	101	3 / 3 ()	aun		แนเบเง

1. Overview

This documentation will enable the developer to customize and improve the system with ease.

	Documentation	for	system	adm	inis	trato	rs
--	---------------	-----	--------	-----	------	-------	----

2. Ant Build Script

The developer can modify the build.xml file.

Documentation for syst	tem administrators
------------------------	--------------------

3. Theme

The developer can customize the cascading stylesheet to change the theme.

	Documentation	for	system	administrators
--	---------------	-----	--------	----------------

4. Internationalization

The developer can add localized messages by editing the ApplicationResources.properties file.

Documentation for sy	∕stem adm	ninistrato	ors
----------------------	-----------	------------	-----

5. Images

The developer can add new pictures under the images directory.

Documentation for system adr	ministrators
------------------------------	--------------

6. Database Schema

The developer can modify the database by editing the openmpis-schema.druid file. He will also have to modify the SQL maps, data transfer objects, services and data access objects if needed.
