Developer Manual

1. Overview

This documentation will enable the developer to customize and improve the system with ease.

2. Ant Build Script

The developer can modify the build.xml file.

3. Theme

The developer can customize the cascading stylesheet to change the theme.

4. Internationalization

The developer can add localized messages by editing the ApplicationResources.properties file.

5. Images

The developer can add new pictures under the images directory.

6. Database Schema

The developer can modify the database by editing the openmpis-schema.druid file. He will also have to modify the SQL maps, data transfer objects, services and data access objects if needed.

6. File Listing

The developer can modify the files listed here.

1.   com
2.   googlecode
3.   openmpis
4.   log4j.properties
5.   mail.properties
6.   sqlmapconfig.properties
7.   action
8.   * AbductorAction.java
9.   add
10.   edit
11.   view
12.   list
13.   delete
14.   poster
15.   AuthenticateAction.java
16.   CaseAction.java
17.   FeedbackAction.java
18.   LoginAction.java
19.   LogoutAction.java
20.   PasswordAction.java
21.   * PersonAction.java
22.   report
23.   delete
24.   * RelativeAction.java
25.   delete
26.   * ReportAction.java
27.   add
28.   edit
29.   view
30.   list
31.   delete
32.   * SearchAction.java
33.   regular search
34.   advanced search
35.   UserAction.java
36.   package.html
37.   dto
38.   Abductor.java
39.   Log.java
40.   Message.java
41.   Person.java
42.   Relative.java
43.   Report.java
44.   User.java
45.   package.html
46.   form

47.   AbductorForm.java
48.   FeedbackForm.java
49.   LoginForm.java
50.   MessageForm.java
51.   PasswordForm.java
52.   PersonForm.java
53.   RelativeForm.java
54.   ReportForm.java
55.   SearchForm.java
56.   UserForm.java
57.   package.html
58.   persistence
59.   ibatis
60.   abductor.xml
61.   log.xml
62.   message.xml
63.   person.xml
64.   relative.xml
